Achilla - demo

Presenting a venerable United Nations of talents Goth metal group Achilla includes players from Italy, Mexico, the UK, and one extraordinary Hungarian singer in Martamaria, whose Guinness World Record breaking range spans heavenly hosannas to guttural notes belched from the basements of Hell. Musically also Achilla combine a number of elements ostensibly worlds apart. By the end of the first track here we've heard some crushing metal power, intricate guitar noodles, grand orchestral ambiences and right in the middle of it all acoustics and a piano melody, yet remarkably it all fits without ever sounding like a messy pile up chucking in everything for the purpose of merely showing off. Go and play this to the elderly anti-immigration grump in your family; we should feel blessed to be able to count a band of these considerable talents as part of London's underground.
